DETAILED ACTION

Remarks

1. The Amendment filed on December 12, 2006 has been received and entered. Claims 1-12 have been canceled. New claims 13-23 have been added. Therefore, claims 13-23 are now pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 18 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 18 and 21 recites the limitation "the content" in line 5, line 4 and line 5 respectively. There is insufficient antecedent basis for this limitation in the claim.

Claims 1 and 21 state "controlling method" and "instruction for controlling" in the respective preambles. The body of the claims never actually controls anything. There is no nexus between preamble and body of claim and it does not achieve the intended use of controlling as recited in preamble.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 13-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Eyal (US 2003/0018799 A1).

As per claims 13, 18 and 21 Eyal is directed to a controlling method, device and instructions of a content obtaining device, the content obtaining device obtaining a content data from a content providing device, the controlling method comprising the steps of:

generating a search information comparing content information in accordance with the content and types of the content information (paragraph 0023, lines 3-5);

searching for a new content information in accordance with the search information from the content providing device (paragraph 0025, second column, lines 1-3); and

displaying the new content information in accordance with a result of the searching (paragraph 0025, second column, lines 11-12).

Art Unit: 2165

As per claims 14, 19 and 21 Eyal is directed to wherein the content information includes at least one of a genre name, music title, and artist name (paragraph 0024, lines 3-6).

As per claims 15, 20 and 22 Eyal is directed to wherein the types of content information includes at least one of a genre name, music title, and artist name (paragraph 0024, lines 3-6).

As per claim 16 Eyal is directed to further comprising the step of reading out the new content information (paragraph 0026, lines 1-2).

As per claim 17 Eyal is directed to further comprising the step of reproducing the new content information (paragraph 0025, second column, lines 12-16).

Response to Arguments

6. Applicant's arguments with respect to claims 13-23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2165
